This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims**

1. (Currently Amended) A method for displaying data on a display monitor under control of a computer, comprising:

receiving a user request including a search criteria;

querying a database on the search criteria to access data records satisfying the search criteria, wherein each accessed data record includes the field of data, wherein there is a display area for each record;

retrieving one or more records matching [[a]] the search criteria, wherein each record includes at least one field of data; and

when a field of data includes a separator indicating that there are multiple values for the field,

displaying in a page a first portion of the field of data and a graphical element indicating that there is a second portion of the field of data within a display area of the page, further comprising displaying in the display area for each record the at least first portion of the field of data from each accessed data record, wherein the page is enabled to selectively present the first and second portion of the field for the record in response to user input; and

enabling the page to selectively present the first and second portions of the field of data in response to user input passing over the graphical element, wherein displaying the first portion in the display area comprises displaying a first value in the data field, and wherein presenting the first and second portions in response to user input comprise displaying all the values from the data field [[:]]

receiving a user request including a search criteria; and  
querying a database on the search criteria to access data records satisfying the  
search criteria, wherein each accessed data record includes the field of data wherein there is a  
display area for each record, further comprising displaying in the display area for each record the  
at least first portion of the field of data from each accessed data record, wherein the page is  
enabled to selectively present the first and second portion of the field for the record in response to  
user input;

—wherein displaying the first portion in the display area comprises displaying a first value  
in the data field, and wherein presenting the first and second portions in response to user input  
comprise displaying all the values from the data field .

2. (Previously Presented) The method of claim 1, wherein presenting the first and  
second portions of the field of data comprises displaying the first and second portions in response  
to the user input.

3. (Original) The method of claim 2, wherein selectively presenting the first and  
second portions comprises displaying the first and second portions as hover text superimposed  
over the display area displaying the first portion of the field of the data.

4. (Original) The method of claim 1, wherein the page is an HTML page and wherein  
an HTML alternative text attribute element is used to enable the page to selectively  
present the first and second portions of the field of data in response to user input.

5. (Cancelled)

6. (Cancelled)

7. (Original) The method of claim 1, further comprising displaying at least one  
additional field of data in each display area for each accessed record.

8. (Original) The method of claim 1, wherein the first and second portions are presented in response to user input indicating movement of a graphical pointer over the displayed graphical element.

9. (Previously Presented) A system for displaying data, comprising:  
a computer;  
a display monitor under control of the computer,  
means for receiving a user request including a search criteria;  
means for querying a database on the search criteria to access data records satisfying the search criteria, wherein each accessed data record includes the field of data, wherein there is a display area for each record;  
means for retrieving one or more records matching [[a]] the search criteria, wherein each record includes at least one field of data; and  
when a field of data includes a separator indicating that there are multiple values for the field,  
means for displaying in a page on the display monitor a first portion of the field of data and a graphical element indicating that there is a second portion of the field of data within a display area of the page, further comprising means for displaying in the display area for each record the at least first portion of the field of data from each accessed data record, wherein the page is enabled to selectively present the first and second portion of the field for the record in response to user input; and  
means for enabling the page to selectively display on the monitor the first and second portions of the field of data in response to user input passing over the graphical element wherein the means for displaying the first portion in the display area comprises displaying a first value in the data field, and wherein presenting the first and second portions in response to user input comprise displaying all the values from the data field [[:]]  
receiving a user request including a search criteria; and  
querying a database on the search criteria to access data records satisfying the

search criteria, wherein each accessed data record includes the field of data wherein there is a display area for each record, further comprising displaying in the display area for each record the at least first portion of the field of data from each accessed data record, wherein the page is enabled to selectively present the first and second portion of the field for the record in response to user input;

— wherein displaying the first portion in the display area comprises displaying a first value in the data field, and wherein presenting the first and second portions in response to user input comprise displaying all the values from the data field .

10. (Original) The system of claim 9, wherein the means for displaying the first and second portions of the field of data comprises displaying the first and second portions in response to the user input.

11. (Original) The system of claim 10, wherein the means for selectively displaying the first and second portions comprises displaying the first and second portions as hover text superimposed over the display area displaying the first portion of the field of the data.

12. (Original) The system of claim 9, wherein the page is an HTML page and wherein an HTML alternative text attribute element is used to enable the page to selectively present the first and second portions of the field of data in response to user input.

13. (Cancelled)

14. (Cancelled)

15. (Original) The system of claim 9, further comprising displaying at least one additional field of data in each display area for each accessed record.

16. (Original) The system of claim 9, wherein the first and second portions are displayed in response to user input indicating movement of a graphical pointer over the displayed graphical element.

17. (Currently Amended) An article of manufacture for displaying data on a display monitor under control of a computer, the article of manufacture comprising a computer usable media including at least one computer program embedded therein that is capable of causing the computer to perform:

receiving a user request including the search criteria;  
querying a database on the search criteria to access data records satisfying the  
search criteria, wherein each accessed data record includes the field of data, wherein there is a  
display area for each record;

retrieving one or more records matching [[a]] the search criteria, wherein each record includes at least one field of data; and

when a field of data includes a separator indicating that there are multiple values for the field,

displaying in a page a first portion of the field of data and a graphical element indicating that there is a second portion of the field of data within a display area of the page, further comprising displaying in the display area for each record the at least first portion of  
the field of data from each accessed data record, wherein the page is enabled to selectively  
present the first and second portion of the field for the record in response to user input; and

enabling the page to selectively present the first and second portions of the field of data in response to user input passing over the graphical element, wherein displaying the first  
portion in the display area comprises displaying a first value in the data field, and wherein  
presenting the first and second portions in response to user input comprise displaying all the  
values from the data field [[:]]

receiving a user request including a search criteria; and  
querying a database on the search criteria to access data records satisfying the

search criteria, wherein each accessed data record includes the field of data wherein there is a display area for each record, further comprising displaying in the display area for each record the at least first portion of the field of data from each accessed data record, wherein the page is enabled to selectively present the first and second portion of the field for the record in response to user input;

— wherein displaying the first portion in the display area comprises displaying a first value in the data field, and wherein presenting the first and second portions in response to user input comprise displaying all the values from the data field .

18. (Previously Presented) The article of manufacture of claim 17, wherein presenting the first and second portions of the field of data comprises displaying the first and second portions in response to the user input.

19. (Original) The article of manufacture of claim 18, wherein selectively presenting the first and second portions comprises displaying the first and second portions as hover text superimposed over the display area displaying the first portion of the field of the data.

20. (Original) The article of manufacture of claim 17, wherein the page is an HTML page and wherein an HTML alternative text attribute element is used to enable the page to selectively present the first and second portions of the field of data in response to user input.

21. (Cancelled)

22. (Cancelled)

23. (Original) The article of manufacture of claim 17, further comprising displaying at least one additional field of data in each display area for each accessed record.

24. (Original) The article of manufacture of claim 17, wherein the first and second portions are presented in response to user input indicating movement of a graphical pointer over the displayed graphical element.
